Products specified as truckload quantities will be available in all sizes and less than truckload, as demand grows.

If you feel that any of these items show continuous growth potential, please let us know and Colledgewood will accommodate runs with lesser quantities for a reasonable period of time.

On some of the smaller quantity products, all sizes may not be available within our lead time and your production schedule requirements. The options are to cut down from the next larger size, or wait for our next production run of that product.

*“Colledgewood has never delivered late in more than 43 years.”*

Gary Colledge
